VIDERITY

STRATEGIC, CREATIVE, TECHNICAL

Cybersecurity Services

Built for Resilience. Proven in Performance.

Cyber threats are evolving, and so are the environments they target. At Viderity, cybersecurity is more than a set of tools, it's a mindset embedded in everything we deliver. We protect critical systems, guide secure innovation, and respond rapidly to risk, all while keeping your mission and users at the center of everything we do.

With a legacy of successful service to federal agencies and exceptional past performance ratings, Viderity brings the structure, scale, and skill to help large organizations defend what matters most.

Mission Driven Protection

Viderity designs cybersecurity frameworks that adapt to your infrastructure, grow with your mission, and defend against emerging threats. Whether supporting data-driven platforms or securing access control systems for enterprise facilities, our approach is grounded in discipline and driven by measurable results.

We deliver:

- **Cybersecurity programs aligned with mission-critical goals**
- **Lifecycle protection from design to deployment and beyond**
- **Secure development for applications used by thousands of public stakeholders**
- **Cloud and infrastructure security tailored to hybrid federal environments**
- **Real-time threat detection and incident response, across any environment**
- **Expertise in securing connected physical systems like surveillance and access control**

How We Protect Your Ecosystem

Governance and Cyber Strategy

We help organizations define their cybersecurity roadmap, align it with regulatory requirements, embed accountability across all business units, and mature those processes.

- Risk and gap assessments
- Regulatory compliance for FISMA, FedRAMP, CMMC, and GDPR
- Executive-level dashboards and policy development
- Vendor and supply chain security governance

Our governance team supports federal programs serving educators, grantees, and researchers across every U.S. state and territory.

Cloud and Infrastructure Security

We design defenses for cloud-native and hybrid environments, with layered protections for data, workloads, endpoints, and networks.

- Zero Trust frameworks
- Endpoint detection across thousands of remote devices. support for Authority to Operate (ATO) processes through secure application development, infrastructure hardening, and alignment with NIST RMF and FedRAMP requirements
- Secure cloud adoption and migration planning
- Identity governance and privileged access controls

Our cybersecurity solutions are integrated into live platforms reaching broad public audiences through federally-supported services. We maintain threat visibility across environments through automation, monitoring, and human intelligence.

Secure Application Development

Security is built into our DevSecOps processes. From wireframe to launch, every application is reviewed for vulnerabilities and tested for resilience.

- Static and dynamic application testing
- Secure development lifecycle (SDLC) integration
- Code integrity assurance
- Remediation workflows and release validation

Our work supports mission-critical applications including award nominations and scientific data tools.

Data Privacy and Protection

We align privacy with usability to protect the rights of data owners and reduce risk to the organization.

- Privacy by design
- Data classification and governance
- Encryption and loss prevention
- User transparency and consent protocols

Viderity supports federal systems that manage sensitive user data and grant application workflows from tens of thousands of contributors.

Lifecycle Cybersecurity Support

Cybersecurity is ongoing. Our support matures with your systems and threat landscape.

- Security awareness training
- Continuous compliance monitoring
- Managed detection and response (MXDR)
- Monthly reporting and executive briefings

Our contracts have included application and infrastructure protection for long-running federal platforms with uptime exceeding 99.99 percent. Viderity ensures security spans both digital and physical domains for clients integrating smart building components.

Why Clients Trust Viderity

17+ years

17+ years of federal performance with exceptional customer ratings

10,000

Secure programs reaching over 10,000 stakeholders nationwide

Security

Security embedded into award-winning digital platforms

DCAA

DCAA-compliant systems and federal-ready delivery teams

About Viderity:
Viderity is a HUBZone and WOSB-certified professional services firm that empowers organizations through digital innovation, strategic consulting, creative design, advanced technology, and operational excellence. We don't just implement technology, we help clients reimagine how to leverage it to drive transformation, enhance outcomes, and deliver lasting impact. With a proven track record across diverse industries, Viderity offers solutions that seamlessly align with organizational missions, delivering measurable value across Federal, both DoD and civilian, and Commercial sectors. Our consistent Exceptional ratings on Contractor Performance Assessment Reports reflect our unwavering commitment to excellence. Backed by a highly credentialed team, with over one-third holding advanced degrees (master's or doctorates) and professional certifications, Viderity ensures superior results in every engagement.
